 268 pages.

Todd Landman*
 University of Nottingham

The first part of the book is devoted to a general introduction to the theory of
 differential equations. The author starts with the linear case and then moves to
 the nonlinear case. The second part is devoted to the theory of integral
 equations. The author starts with the linear case and then moves to the
 nonlinear case. The third part is devoted to the theory of partial
 differential equations. The author starts with the linear case and then moves
 to the nonlinear case. The fourth part is devoted to the theory of
 stochastic differential equations. The author starts with the linear case and
 then moves to the nonlinear case. The fifth part is devoted to the theory
 of optimal control. The author starts with the linear case and then moves
 to the nonlinear case. The sixth part is devoted to the theory of
 dynamic programming. The author starts with the linear case and then moves
 to the nonlinear case. The seventh part is devoted to the theory of
 game theory. The author starts with the linear case and then moves to the
 nonlinear case. The eighth part is devoted to the theory of
 queueing systems. The author starts with the linear case and then moves to
 the nonlinear case. The ninth part is devoted to the theory of
 simulation. The author starts with the linear case and then moves to the
 nonlinear case. The tenth part is devoted to the theory of
 numerical analysis. The author starts with the linear case and then moves
 to the nonlinear case.

1.0. The author of this book is a member of the Russian Academy of Sciences.
 He has published many books and articles on the theory of differential
 equations, integral equations, partial differential equations, stochastic
 differential equations, optimal control, dynamic programming, game theory,
 queueing systems, simulation, and numerical analysis.

pology and social work, and for those who generally seek greater resources in participant-observer methodologies and community based advocacy.

Katharine G. Young*

Professor, Boston College Law School

* Katharine G. Young is Professor of Law at Boston College Law School. She is the author of *Constituting Economic and Social Rights* (Oxford University Press, 2012), and the edited collections, *The Public Law of Gender* (Cambridge University Press, 2016, with Kim Rubenstein), and *The Future of Economic and Social Rights* (Cambridge University Press, 2019). She completed her SJD at Harvard Law School, where she was a Fellow at Harvard University's Project on Justice, Welfare and Economics and her B.A./LL.B. (Hons) at the University of Melbourne. She is currently editing, with Malcolm Langford, *The Oxford Handbook of Economic and Social Rights*.

Annie Isabel Fukushima, *Migrant Crossings: Witnessing Human Trafficking in the U.S.* (Stanford University Press, 2019) ISBN 978-1-5036-
