adopted right after the Civil WaAnd you know that if the issuof the franchise for women came up today, we would not have to have a constitutional amendment. Someone would come to the Supreme Court and say, "Your Honors, in moderacy, what could be a greater denial of equal protection than denial of the franchise and the Court would say, "Yes! Even though it never meant it before, the Equal Protection Clamesens that women have to have the vote." But that's not how the American people though 1920. In 1920, they looked at the Equal Protection Clause and said, "What does it mealfield, it clearly doesn't mean that you can't discriminate in the franchise — not only one that on the basis of property ownership, on the basis of literacy. None of that nonstitutional. And therefore, since it wasn't unconstitutional, and we wanted it to be, we did things the good old fashioned way and adopted an amendment.

Now, in asserting that originalism used to be orthodoxy, I do not mean to imply that judges did not distort the Constitution now and

That was step one. Step two, I mean, that **ovilly** get you so far. There is no text in the Constitution that you could reinterpret to createght to abortion, for example. So you need something else. The something else is called that trine of "Substantive Due Process." Only lawyers can walk around talking att substantive process, in rasich as it's a contradiction in terms. If you referred to substantive process or procedurates at a cocktail party, people would look at you funny. But, lawyertalk this way all the time.

What substantive due process is is quite being the Constitution has a Due Process Clause, which says that no person shall be deprive it entired fliberty or property without due process of law. Now, what does this guarantee? Does it gute ealife, liberty or property? No, indeed! All three can be taken away. You can be fined, or groupe incarcerated, your even be executed, but not without due process of law. It's a procedural guara the the Court said, and this goes way back, in the 1920s at least, in fact the treese to do it was Dred Scott. But it became more popular in the 1920s. The Court sthere are some liberties at hare so important, that no process will suffice to take them any allence, substantive due process.

Now, what liberties are they? The Court will you. Be patientWhen the doctrine of substantive due process was initially announce dast limited in this way, the Court said it embraces only those liberties that are fundamental democratic society and rooted in the traditions of the American people.

Then we come to step three. Step three: thattalfiron is eliminated. Within the last 20 years, we have found to be covered by due process the trogathortion, which was so little rooted in the traditions of the American people that it was criminal for 200 years; the right to homosexual sodomy, which was so little rooted the traditions of the American people that it was criminal for 200 years. So it is literally true, and I don'inthathis is an exaggetion, that the Court has essentially liberated itself from the texttbe Constitution, from the text and even from the traditions of the American people. It is up to the Court to say what is covered by substantive due process.

What are the arguments usually made in favor of the Living Constitution? As the name of it suggests, it is a very attractipe ilosophy, and it's hard to take ople out of it — the notion that the Constitution grows. The major argumenth constitution is a living organism, it has to grow with the society that it governos it will become brittle and snap.

This is the equivalent of, an anthroporphoism equivalent to what you hear from your stockbroker, when he tells you that the stock remains resting for ansasult on the 11,000 level.

a democratic society, persua/deur fellow citizens it's a good ied and enact it. You want the opposite — persuade them the othway. That's flexibility. But to read either result into the Constitution is not to produce flexibility, it to produce what a constitution is designed to produce — rigidity. Abortion, for example, is offge it is off the democratic stage, it is no use debating it, it is unconstitutional. I mean probiting it is unconstitutional; I mean it's no use debating it anymore — now and forever, coastdast, I guess until we amend the Constitution, which is a difficult thing. So, for whatever as on you might like the Living Constitution, don't like it because it provides flexibility.

That's not the name of the game. Some people also seem to like is the thorough think it's a good liberal thing — that somehow this is a constituted liberal battle, and conservatives like the old fashioned originalist Constitution and liberal solution like the Living Constitution. That's not true either. The dividing line between those who believe in the Living Constitution and those who don't is not the dividing line between conservatives and liberals.

Conservatives are willing to grow the Constituttorcover their favorite causes just as liberals are, and the best example of that is two causeannounced some years ago on the same day, the same morning. One case wasmer v. Evans, in which the people of Colorado had enacted an amendment to the state constitution by plebiscite

Some people are in favor of the Living Constitution cause they think it always leads to greater freedom — there's just nothing to lose, the leving Constitution will always provide greater and greater freedom, more and movets. Why would you think that It's a two-way street. And indeed, under the aegis of the Living Constitution, some freedoms have been taken away.

Recently, last term, we reversed 5-year-old decision of the Court, which had held that the Confrontation Clause — which oldn't be clearer, it says, filall criminal prosecutions, the accused shall enjoy the right ... to be confronted the witness against him." But a Living Constitution Court held that all the was necessary to comply with the Confrontation Clause was that the hearsay evidence which is introved — hearsay evidence ans you can't cross-examine the person who said it because he's ribeircourt — the hearsay evidence has to bear indicia of reliability. I'm happy to say that weversed it last term with the votes of the two originalists on the Court. And chopinion said that the only inclium of reliability that the Confrontation Clause acknowledges is confrontation. You bring the sin to testify and to be cross-examined. That's just one example are others, of eliminating liberties.

So, I think another example is thight to jury trial. In a series of cases, the Court had seemingly acknowledged that you didn't have trial by jury of the acts that increase your sentence. You can make the increased seemed a "sentencing factor" — youet 30 years for burglary, but if the burglary is committed with a gun, as atsencing factor the judgean give you another 10 years. And the judge will decide whether in sore likely than not. Well, we held recently, I'm happy to say, that this violates the right to a trial by yurThe Living Constitution would not have produced that result. The Living Constitution, like the legitures that enacted less laws would have allowed sentencing factors to be determibed because all the Living Constitution assures you is that what will happen is what the purpose of constitutional guarantees.

Well, I've talked about some of the false virsured the Living Constitution, let me tell you what I consider its principle vices around the greatest — you should vays begin with principle — its greatest vice is its illegitimacy. The only reastederal courts sit in judgment of the constitutionality of federal legislican is not because theore explicitly authorized to do so in the Constitution. Some modern constitutions give thousand court explicit authority to review German legislation or finch legislation for its constitutionality, our Constitution doesn't say anything like that. But John Marshall says in

particularly those involving the ighth Amendment, if you think its simply meant to reflect the evolving standards of decency that mark the progress of a maturing society — if that is what you think it is, then why in the world would you have itempreted by nine lawyers? What do I know about the evolving standards the cency of American souty? I'm afraid to ask. If that is what you think the Constitution is, the larguistatury v. Madisons wrong. It shouldn't be up to the judges, it should be up to the legislature who should have a system like the English — whatever the legislature thinks is constitutions. They know the evolving standards of American society, I don'so in principle, it's incompatible with the legal regime that America has established.

Secondly, and this is the killer argument — I mean, it's the best delargement — they say in politics you can't beat somebodythenobody, it's the same thing with principles of legal interpretation. If you don'believe in originalism, theyou need some other principle of interpretation. Being aom-originalist is not enough. You see, I have my rules that confine me. I know what I'm looking for. When I find it — the riginal meaning of the Constitution — I am handcuffed. If I believe that the First Amdement meant when it was adopted that you are entitled to burn the American flag, I have tomosout that way even though I don't like to come out that way. When I find that the original earning of the jury trial guarantee is that any additional time you spend in prison which deches upon a fact must depend upon a fact found by a jury — once I find that's what the jury triguarantee means, I am handcuffed. Though I'm a law-and-order type, I cannot do all the mean eovertive things I would like to do to this society. You got me.

Now, if you're not going to control your judges that way, what other criterion are you going to place before them? What is the criterion threaterns the Living Constitutional judge? What can you possibly use, besides original meaning? Takobut that. Natural law? We all agree on that, don't we? The philosophy of John Rawls? That'syeasser really is nothing else. You either tell your judges, "Look, this is a law, like about the meaning it had when it was adopted." Or, you tell your judges, "Govern Visu tell us whether people under 18, who committed their crimes when they were undershould be executed. You tell us whether there ought to be an unlimited right to abortion or a partialight to abortion. You hake these decisions for us." I have put this question — you know back at law schools with some frequency just to make trouble — and I put this question to the faculty all the time, or incite the students to ask

thing to do is to get a good lawyer. If on the othernd, we're picking people to draw out of their own conscience and experience a new constitutional sorts of new values to govern our society, then we should not look principally for good lawyers. We should look principally for people who agree with us, the majority, as to whether ought to beithright, that right and the other right. We want to pick people that uld write the new constitution that we would want.

And that is why you hear in the iscourse on this subject, petentalking about moderate, we want moderate judges. What is a moderate pinete ation of the text? Halfway between what it really means and what you'd like to mean? There is no suchritgias a moderate interpretation of the text. Would you ask a lawyer, "Draw memoderate contract?" The only way the word has any meaning is if you are looking for some tone write a law, to write a constitution, rather than to interpret one. The moderate judge is who will devise the new constitution that most people would approve of. So, for example, had a suicide case some terms ago, and the Court refused to hold that there is a constitutional right to assisted suicide. We said, "We're not yet ready to say that. Stay tuned, in a few syettime time may come, but we're not yet ready." And that was a moderate decision, becausink thost people would nowant — if we had gone, looked into that and created ational right to assisted side, that would have been an immoderate and extremist decision.

I think the very terminology suggests where wetharrived — at the point of selecting people to write a constitution, rather that people to give us the fair meaning of one that has been democratically adopted. And when that happenheen the Senate interrogates nominees to the Supreme Court, or to the lower courts — you know, "Judge so-and-so, do you think there is a right to this in the Constitution? You don't? Well, my constituents think there ought to be, and I'm not going to appoint to the cost someone who is not going find that" — when we are in that mode, you realize, we have rendered the C
