THE TENDER BAR-REFLECTIONS

"We went there for everything we needed. We went there when thirsty, of course, and when hungry and when dead tired. We went there when happy, to celebrate, and when sad, to sulk. We went there after weddings and funerals, for something to settle our nerves and always for a shot of courage just before. We went there when we didn't know what we needed, hoping someone might tell us...Most of all we went there when we needed to be found."

As you finish the memoir and enter into your first year of college, it will be important to examine the decisions that you make while here at BC. Taking time to reflect upon your motivations, your desires, and your fears will give you a much better perspective on your life—where you came from, where you are presently, and where you are heading. Boston College hopes to partner with you during this journey through the careful discernment of the intellectual, spiritual, and social components that affect you during your undergraduate journey.
